Verisite Mobile Valuation Solutions
EQUITY LENDING

ACCURATE, FAST, SECURE VALUATIONS

Strengthen your equity lending process with the best mobile device-based property valuation software available today: the Verisite mobile valuation tools. Replace your equity lending property inspection service with a quicker, more accurate, and less expensive alternative.

- Create orders to send to borrowers with your subject property inspection requirements.

- Borrowers securely provide interior/exterior property photos & videos with the Verisite mobile app.

- Photos & videos are combined with additional collateral data that exhibits property data, AVM value, comparable sales, risk factors, location map and more.

- Completed Verisite Photo Report deliverable is available in PDF or HTML with QR code for mobile access to photos & videos.

5 YEARS OF TRIED AND TRUE MOBILE APPRAISALS AND PROPERTY INSPECTIONS COMBINED WITH 30 YEARS OF THE INDUSTRY'S MOST RELIABLE TECHNOLOGY.

SNAPSHOT OF BENEFITS

Utilizing secure mobile technology for to-the-moment property detail, homeowners, borrowers, appraisers, inspectors, Realtors, and other property data collectors can gather data instantly.

- Valuation reports delivered in minutes instead of days.

- Includes property photos, videos and details plus AVM value, risk scores, local market analysis, price change info, area sales volume, and more.

- Verisite guarantees that the pictures in the report are genuine photos and not "pictures of a picture" from the phone's camera roll.

- Verisite verifies with geo-location that the pictures are at the subject property location – within 2 feet of the camera.

- Video features further prevent fraud and provide richer detail on the subject.

- Great for rural property inspections: Verisite gathers photos and data without service, then submits the report when service is available.

NOT JUST FOR EQUITY...

Verisite can be used on purchase and refi loans when drive-bys, desktop appraisals, exterior-only inspections and other appraisal products are ordered to provide more property detail: as addendums or exhibits that include interior inspection info.

Verisite is also extremely helpful on sub-loan products such as disaster relief inspections, new construction progress evaluations, portfolio reviews, and more.
